Crack me 1

Add to #Ghidra

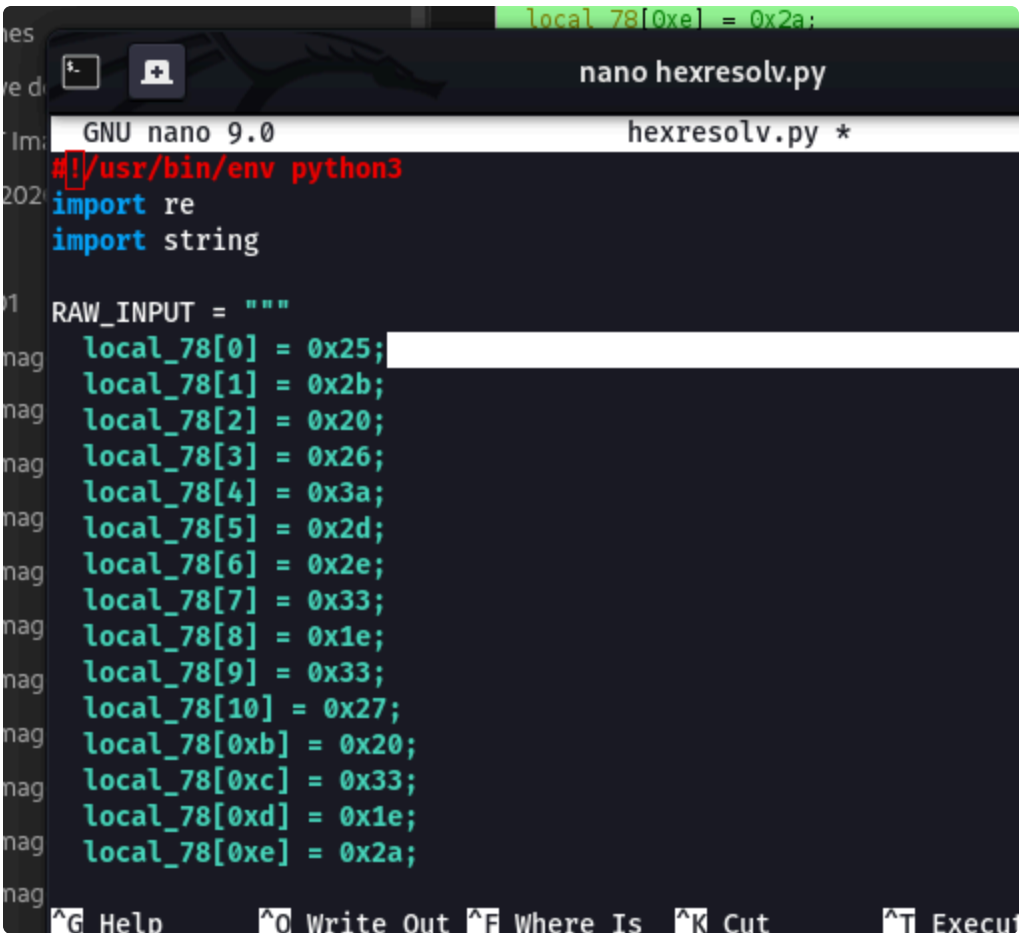

Found a function called main in Function folder

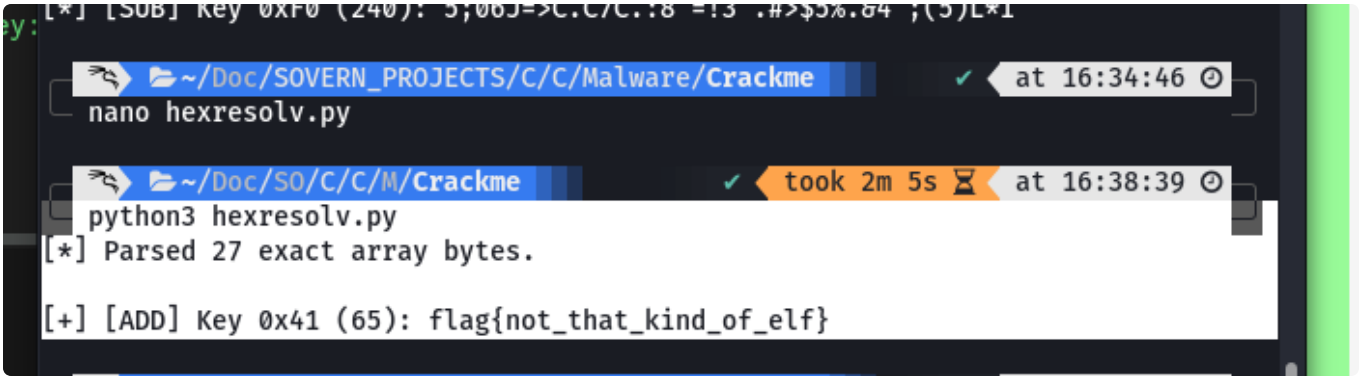

while inspecting the C i found random hex values

```
local_78[0] = 0x25;
local_78[1] = 0x2b;
local_78[2] = 0x20;
local_78[3] = 0x26;
local_78[4] = 0x3a;
local_78[5] = 0x2d;
local_78[6] = 0x2e;
local_78[7] = 0x33;
local_78[8] = 0x1e;
local_78[9] = 0x33;
local_78[10] = 0x27;
local_78[0xb] = 0x20;
local_78[0xc] = 0x33;
local_78[0xd] = 0x1e;
local_78[0xe] = 0x2a;
local_78[0xf] = 0x28;
local_78[0x10] = 0x2d;
local_78[0x11] = 0x23;
local_78[0x12] = 0x1e;
local_78[0x13] = 0x2e;
local_78[0x14] = 0x25;
local_78[0x15] = 0x1e;
local_78[0x16] = 0x24;
local_78[0x17] = 0x2b;
local_78[0x18] = 0x25;
local_78[0x19] = 0x3c;
local_78[0x1a] = 0xffffffbf;
memset(local_98,0x41,0x1b);
```

And then converted the hexs to human readable letters

Finally
